

DATAMASTER®

Duplex Multimode OM3 Fibre Patch Cords

Duplex multimode fibre patch cords have two fibres in a figure-8 configuration as required for applications that require simultaneous bi-directional data transmission such as switches, patch panels and servers.

Datamaster OM3 Fibre Patch Cords are constructed from 50/125um fibre with 125um cladding contained within a 3.0mm LSZH (Low Smoke Zero Halogen) aqua jacket.
